This error means that you may need to revert to a previous configuration of your PC.

**Buy Microsoft 365** 

- 1. Turn off your PC by pressing and holding the power button, then wait and press it again turn it back on. When you see your PC manufacturer's logo, turn the PC off again. Repeat the process until you see a **Please wait** message.
- 2. On the next screen, select **Troubleshoot**, then choose **Advanced options** > **Startup Settings**.
- 3. Select the **Restart** button.
- 4. When your PC restarts this time, you can choose how to start. Choose **last known good configuration**.
- 5. Make sure that your drivers are current. In the search box on the taskbar, type **drivers**, and then select **Device Manager** from the list of results. In Device Manager at the top, select **Scan for hardware changes**. Select the **Start** button, then select **Power** > **Restart**.
